Project Data Sheet

Title Scrappy Trees

Location Mountain View, Ca

Description A series of 10 trees were created for various interior lobbies. Each tree was made entirely from reclaimed mild steel scraps and lighted within, using LED rope lights. The steel scraps were hammered into C shape collars and welded together to form a tree like structure. Collars are overlapped over one another irregularly creating openings for the light to illuminate through.

Date 2010

Medium recycled mild steel

Dimensions 12'H x 8'W x 8'D

Commissioned by Merlone Geier Partners
